Roll Number of Student: 2410030675
Name of Student: ANANYA BANSAL
Batch: 2024-28

2026-27

CANDIDATE’S DECLARATION

I, **ANANYA BANSAL**, do hereby declare that the internship report titled “**AI and Data Analytics Internship**” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name: ANANYA BANSAL

Roll No.: 2410030675

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful to IILM University and the School of Computer Science and Engineering for providing the opportunity to participate in the internship program conducted through the Cisco Networking Academy. The program provided structured learning in modern artificial intelligence, applied AI, customer-review analysis, and data analytics.

I am sincerely grateful to the instructors and coordinators for their guidance and for providing learning resources that helped me develop a clearer understanding of AI and data analytics concepts. I also express my gratitude to my parents for their blessings and continuous support.

INTERNSHIP COMPLETION CERTIFICATE

The internship program was conducted through IILM University using Cisco Networking Academy learning courses. The available completion certificates document successful completion of Introduction to Modern AI, Apply AI: Analyze Customer Reviews, and Data Analytics Essentials.

Certificate 1: Apply AI: Analyze Customer Reviews

Certificate 2: Introduction to Modern AI

Certificate of Course Completion

Ananya Bansal

has successfully achieved student level credential for completing the Introduction to Modern AI course.

The student was able to proficiently:

- *Explain basic concepts in AI and Machine Learning.*
- *Use photo apps to classify objects, blur the background of a photo, and explain how object detection and image segmentation help to accomplish this.*
- *Use machine translation and explain the nuances and limitations of using AI for language translation.*
- *Explain fundamentals of how large language models work, and how to prompt LLMs to make use of these traits.*
- *Demonstrate use cases of LLM enabled chatbots: idea generation, summarization, rewording, and grading.*
- *Utilize two-way dialogue with chatbots, such as practicing for mock interviews.*
- *Facilitate collaboration between two chatbots to achieve a goal.*
- *Use LLMs with tools (web search, web page scraping).Multimodal prompting with images and text.*

4. PROJECT DESCRIPTION

4.1 INTRODUCTION

The internship titled “**AI and Data Analytics Internship**” was undertaken through the IILM University internship program delivered using Cisco Networking Academy courses. The program period shown in the course portal was 15 May 2026 to 15 June 2026. During this period, the internship learning path included three completed courses: Introduction to Modern AI, Apply AI: Analyze Customer Reviews, and Data Analytics Essentials.

The internship provided a structured exposure to the foundations of modern artificial intelligence and data analytics, followed by an applied AI use case involving customer reviews. The overall learning focus was to understand how data can be prepared, examined, interpreted, and used with AI techniques to generate useful insights.

4.2 ORGANIZATION PROFILE

IILM University, Greater Noida, U.P., is the academic institution under which the internship program was provided. The internship learning was delivered through the Cisco Networking Academy program. The completion certificates state that the three courses were offered by IILM University through the Cisco Networking Academy program.

The program combined an academic internship framework with structured industry-oriented learning resources. The course portal also shows both self-paced and instructor-led learning components.

4.3 PROBLEM STATEMENT

Modern organizations generate large amounts of information from digital interactions, including customer feedback and operational data. A key challenge is converting such data into meaningful information that can support analysis and decision-making. The internship addressed this learning problem by developing an understanding of modern AI concepts and data analytics, with an applied focus on extracting insights from customer reviews.

4.4 PROJECT OBJECTIVES

- Understand the fundamental concepts and applications of modern artificial intelligence.

- Develop familiarity with AI-assisted analysis of customer reviews and unstructured feedback.
- Understand core data analytics concepts and the role of data in decision-making.
- Learn a structured approach to interpreting data and communicating useful insights.
- Connect AI concepts with practical, real-world analytical use cases.

4.5 SCOPE OF THE PROJECT

The scope of this internship project is educational and analytical. It covers the conceptual and practical learning obtained from the three internship courses and their relationship to AI and data analytics. The applied focus is customer-review analysis, while the broader scope includes modern AI foundations and data analytics principles.

The report does not claim deployment of a production AI system or independent commercial implementation. Its scope is limited to the learning, analysis, methods, and outcomes supported by the internship course work and completion evidence.

4.6 TECHNOLOGIES AND TOOLS USED

Area	Tools / Concepts
Artificial Intelligence	Modern AI concepts and AI-assisted analysis
Applied AI	Customer-review analysis and insight generation
Data Analytics	Data interpretation, analytical thinking and insight extraction
Learning Platform	Cisco Networking Academy / IILM University course environment

Table 4.1: Technologies and learning areas

4.7 SYSTEM ARCHITECTURE

For the internship learning project, the system architecture can be represented as a conceptual analytics pipeline. The pipeline begins with input data such as customer reviews or other structured/unstructured information. The data is then prepared and examined, followed by AI-assisted analysis and interpretation. The final stage is the presentation of insights that can support understanding and decision-making.

Stage	Description
1. Data Input	Customer reviews and relevant analytical data are considered as inputs.
2. Data Preparation	Organize, inspect and prepare information for analysis.
3. AI / Analytical Processing	Apply relevant AI concepts and analytical techniques to identify patterns and insights
4. Insight Generation	Interpret findings from the processed information.
5. Output	Communicate useful insights in a clear and understandable form.

Table 4.2: Conceptual system architecture

4.8 METHODOLOGY

The internship methodology followed a sequential learning process. First, foundational AI concepts were studied through the Introduction to Modern AI course. Next, the Apply AI: Analyze Customer Reviews course introduced an applied context in which AI can be used with customer feedback to derive insights. Finally, Data Analytics Essentials strengthened the understanding of analytical concepts and the role of data in generating useful information.

- 1 Study foundational AI concepts and terminology.
- 2 Understand how AI can be applied to a customer-review analysis problem.
- 3 Examine the role of data preparation, interpretation and analytical reasoning.
- 4 Relate AI-generated or AI-assisted outputs to meaningful insights.
- 5 Document learning outcomes and reflect on practical applications.

The internship completion evidence indicates that the three courses were completed during the program period. Introduction to Modern AI and Apply AI: Analyze Customer Reviews were completed on 13 June 2026, while Data Analytics Essentials was completed on 16 June 2026.

4.9 EXPECTED OUTCOMES

- Improved understanding of modern AI and its practical applications.
- Better understanding of how customer reviews can be treated as a source of analytical insight.

- Improved ability to reason about data, patterns and evidence before drawing conclusions.
- Awareness of how AI and data analytics can complement one another in practical workflows.
- A foundation for further study in machine learning, generative AI, natural language processing and data analytics.

4.10 CERTIFICATES OF COMPLETION AND COMMUNICATION MAIL PROOF

Copies of the three course completion certificates are included in the certificate section of this report. The certificates provide completion evidence for the internship learning courses. The internship communication email supplied by the university should also be attached as proof of communication, as required by the prescribed report format.

Communication email proof is attached on the following pages. The email from IILM University provides the Summer Internship submission instructions, including the report, presentation and public GitHub repository requirements.

COMMUNICATION EMAIL PROOF · PART 1

Submission of Summer Internship data for the AY 2026-27 Inbox x

Apoorva Jain <apoorva.jain@iilm.edu>

to CSE, Tech, Lalit, Vadivel, Industry, ANIK, Hilal, Ramavath, Surabhi, Vikas, Soniya, Director ▾

Dear Students,

As part of your curriculum, you are required to submit the details of the **Summer Internship** you have undertaken.

Please find the link of **Google Form** below and fill in all the required details accurately **on or before 30 August**.

<https://forms.gle/f9Vkfuz3K9YHE4MNA>

Also attached with this email are the **Internship Report Format** and **PPT Guidelines** for your reference.

Internship Report

Kindly prepare your **Internship Report** strictly in the prescribed format.

Internship Presentation (PPT)

There is **no specific format** prescribed for the presentation. However, the **first slide** must include the following:

- IILM University Logo

Wed, Jul 29, 3:54 PM ☆ 😊 ↩ ⋮

COMMUNICATION EMAIL PROOF · PART 2

There is **no specific format** prescribed for the presentation. However, the **first slide** must include the following:

- IILM University Logo
- IILM University Name
- Internship Topic/Title
- Student Name
- Enrollment Number
- Program & Semester
- Organization Name

You may then proceed with the remaining slides in a professional and well-structured manner.

GitHub Repository Submission

You are required to create a **public GitHub repository** and upload your internship documents to it. Please follow the steps below:

1. Create a **public GitHub repository** using the following naming convention:
Session_Name_RollNo_Semester_Section
2. Upload the following documents to the repository:

-
- Internship Report in PDF

COMMUNICATION EMAIL PROOF · PART 3

You may then proceed with the remaining slides in a professional and well-structured manner.

GitHub Repository Submission

You are required to create a **public GitHub repository** and upload your internship documents to it. Please follow the steps below:

1. Create a **public GitHub repository** using the following naming convention:
Session_Name_RollNo_Semester_Section
2. Upload the following documents to the repository:
 - Internship Report in PDF
 - Internship Presentation (PPT) in PDF
 - Internship Completion Certificate in PDF
3. Ensure that the repository is **Public** so that it is accessible for evaluation.
4. Copy the **GitHub repository link** and submit it in the designated field of the Google Form.

Kindly ensure that all the information provided in the Google Form is accurate and that the GitHub repository contains all the required documents before submitting the repository link.
