

IILM UNIVERSITY

Greater Noida, U.P.

AI AND DATA ANALYTICS INTERNSHIP

STUDENT NAME

Ananya Bansal

ENROLLMENT NUMBER

2410030675

PROGRAM & SEMESTER

B.Tech CSE (Core), 5th Semester

SECTION

3CSE21

ORGANIZATION

IILM University through Cisco Networking Academy

INTERNSHIP PERIOD

15 May 2026 – 15 June 2026

Internship Overview

1 Program Delivered as the AI and Data Analytics track under IILM University's Cisco-AICTE Virtual Internship Program.

2 Duration 15 May 2026 to 15 June 2026, following the schedule shared by the internship coordinator.

3 Delivery Platform Coursework hosted on the Cisco Networking Academy platform, accessed through IILM University.

4 Focus Areas Modern AI foundations, applied AI for customer-review analysis, and core data analytics.

5 Outcome Three courses completed, each verified with an individual completion certificate.

Courses Completed

01

Introduction to Modern AI

Completed 14 June 2026

02

Apply AI: Analyze Customer Reviews

Completed 14 June 2026

03

Data Analytics Essentials

Completed 15 June 2026

Internship Objectives

1

Build a working understanding of modern AI concepts, including LLMs and chatbots.

2

Learn how AI can be applied specifically to analyzing customer review text.

3

Strengthen core data analytics skills and data-driven reasoning.

4

Practice turning analytical output into clear, actionable conclusions.

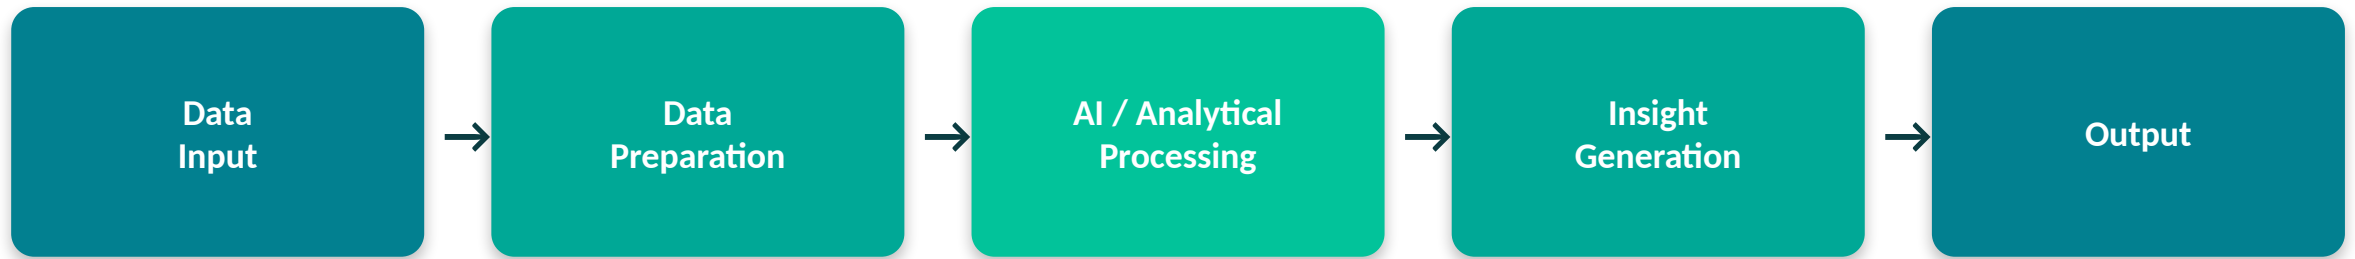

5

Understand how AI and data analytics complement each other in practice.

Applied Focus: Customer Review Analysis

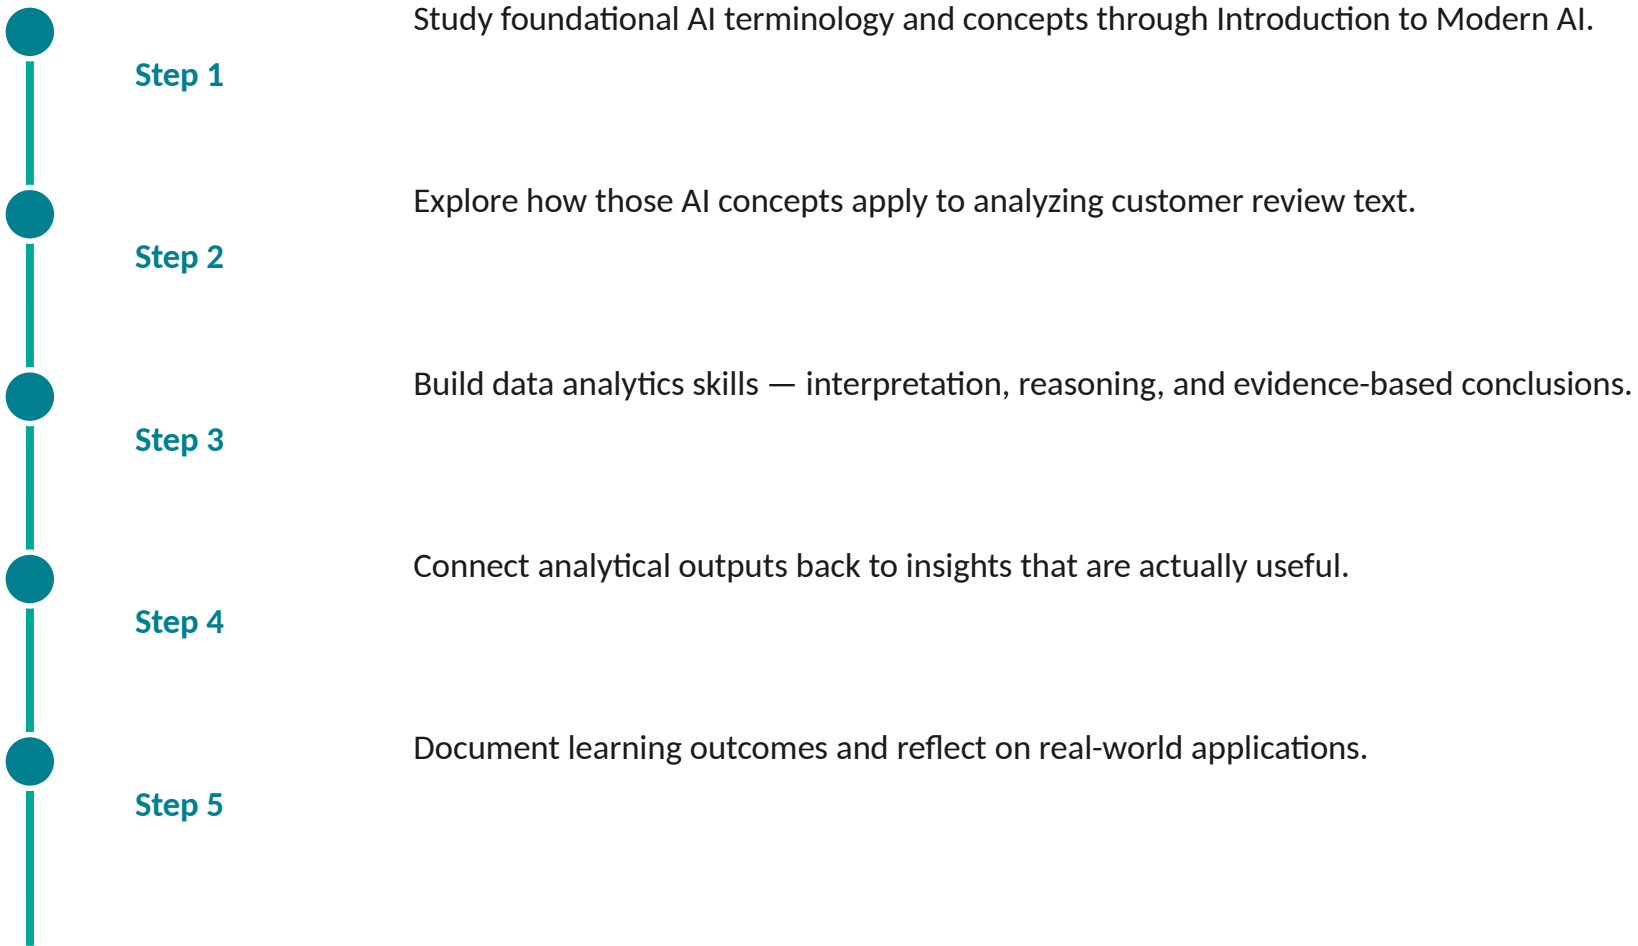

- Customer reviews are a rich but unstructured source of feedback.
- AI tools can process large volumes of this text far faster than manual reading.
- Analytical processing surfaces sentiment, patterns and recurring themes.
- The end goal is converting raw, scattered feedback into usable insight.
- This internship treated it as a hands-on applied-AI learning scenario.

Conceptual Analytics Pipeline

Every stage of the internship's applied-AI use case can be mapped onto this simple pipeline — from raw customer review text through to a communicated insight.

Methodology

Skills and Learning Outcomes

1

A working understanding of modern AI concepts and applications

2

Practical awareness of AI-assisted customer-review analysis

3

Improved data interpretation and analytical reasoning

4

A clearer view of how AI and data analytics work together

5

A foundation for further study in ML, generative AI and NLP

Completion Evidence

Course	Completion Date
Introduction to Modern AI	14 June 2026
Apply AI: Analyze Customer Reviews	14 June 2026
Data Analytics Essentials	15 June 2026

- All certificates identify IILM University as the provider through Cisco Networking Academy.
- All three certificates are included with this internship submission.

Conclusion

- This internship gave me structured, hands-on exposure to both AI fundamentals and data analytics.
- The three courses moved from foundational concepts to an applied, real-world customer-review use case.
- It sharpened my analytical thinking and my awareness of how AI is actually used in practice.
- It leaves me with a solid foundation for further work in ML, generative AI, and NLP.

Thank You
